

R 10/6/11

Shri Ghaliyal
Irrigation Department,
Karjat.

Date : 10th June 2011

Respected Sir,

We have been told that there is a proposal of a dam coming up in Kondhane - Karjat.

Sir, we have a strong objection to this proposal and it is not acceptable to us. We have purchased land in 2007 which totally sums up to 30 acres 28.8 gunthas. This land is our entire property, our future and our reserve for our old age. Without it, we will be in very deep trouble cause we had broken all our Fixed Deposits and even sold our ancestral gold to buy this land. Our entire life's savings are at stake. The current market rate of this land is huge and that too such a chunk of land is not available in Karjat at all. Hence we request you to revisit the thought process and we request you kindly to see if you can possibly shift this dam line a little ahead as, beyond a 500 mts from our land, there is hardly any private land. Please accommodate us and we will be very grateful.

श्रीमान् The details of our property is as follows

12106

9208
93/6/11

Survey No	Pot Hissa	In Guntha	Total in Guntha	In Acre
19	12 12 + Pot kharaba	278 + 627	605	
32	1		10.4	
	7		17.7	
	9 32 G		37.6	
36	7 32 G		32	
	10 32 G		23	
37	1 32 G		160	
38	1		78.4	
	3		79.9	
39	2		61	
40	5		123.8	
			1228.8	30 acres 28.8 guntha

We look forward to an urgent reply from your end . We do not wish to move to the court to seek justice Because we feel you will be kind enough to talk to your authorities and try to work out an amicable solution.

Sir, one more reason of shifting the dam line is that there are these Kondhane caves which is a Nationally protected monument by the Archeolgical survey of India. The approach road of these caves will come under the submergence area. There are very few places where people can spend their weekend and these caves along with Rajmachi fort are the paradise for trekkers from Mumbai and Pune. Thousands of trekkers visit this place every rainy season.

Sir, it is a matter of shifting the dam line by about 500 to 700 meters and that will give us back our life and it will also save the approach to the caves. You can have a survey of this place, beyond 700 meters there is no private land, it will only be Adivasi land and we're sure they will be adequately compensated.

Awaiting an early reply.

With Regards !
